PBS Kids Games

PBS Kids Games includes more than 100 free games with popular PBS Kids characters and popular children's shows. This mini-game collection will entertain and educate preschoolers to important concepts like letters, numbers, shapes, colors, matching, and more. Parents can appreciate that the content is kid-friendly and always has an educational message built in.

PBS Kids Games app is a free selection of learning games featuring your kids' favourite PBS Kids characters. PBS Kids Games is available for free on iPhone, iPad and Android devices.

Ages 2 and above

Dela Kids - Learn English

This is a free alphabet app that helps young children who are just starting their journey into learning the English language. The app's aim is to aid children in knowing the letters of the alphabet, being able to form the letters correctly and to gain confidence in their first steps into the English language.

Ages 3 to 7

Slice Fractions

Slice Fractions is one of the best free apps to learn fractions and reinforces many fraction concepts by challenging kids to slice ice and rocks into different fractional parts so that the pieces fall and clear a path for the Mastodon. Children won't necessarily be practicing fractions in a way that will help them in tests or with worksheets but they will be developing a conceptual knowledge of fractions that is, arguably, more important.

Ages 5 to 11

For Android

Toca Life: World

Toca Life: World mashes together all of the Toca Life apps into one big globe your kid can explore with a flurry of frantic tapping. Even for free, you get plenty to delve into and it encourages open play and improves child's imagination. Bop City has a bunch of stuff to check out, including a hairdresser, theater, and mini mall, each with plentiful interactive elements. Figures can be dragged about, and you can make three custom ones in the free version of the character creator.

As a free app, it's solid, generous stuff – especially on the iPad, where there's more room to play. Combined with other Toca Boca Games, it's pretty much essential.

Toca Life: World is available for free on Android, iPhone and iPad.

Ages - 3 and above

ABCya Games

ABCya Games is a free educational games app that's organized by grade level and subject area. With a bit of help from adults, it's easy for kids to access tons of games.

There's a lot content here which includes interactive games, worksheets, videos and interactive stories. Most of the content is free and games are mostly super-simple, often one-dimensional ways to practice specific skills to keep kids engaged.

ABCya Games is available for free on Android, iPhone and iPad.

Ages - 5 and above

Basic Math skills: addition

Children from ages 4 and 5 (Kindergarten) will find age appropriate games to match their maturing level in mathematics: counting coins, logical sequence, number recognition, association quantity and numbers (1-9) counting, addition, subtraction. Children ages 6 and 7 (first grade and second grade of elementary) practice math activities: counting numbers (tallying), additions without regrouping, subtraction (with coins), and subsequently subtraction without regrouping.

From age 8 to 9 (third grade and fourth grade of elementary school) the math game consists of: mental arithmetic sums of two-digit numbers, mental math subtractions, times tables (learn to multiply), multiplication, and sequences. From age 10 (fifth and sixth grade of elementary school and Middle School) the math game consists of:

Educational apps for children

mental arithmetic additions (with regrouping), subtraction (with regrouping), times tables and division.

Ages 3 to 10

For iPhone, iPad, Android

Friendly Math Monsters for Kindergarten

Friendly Math Monsters is a free math app to learn Numbers, Addition, Subtraction and Sorting in an entertaining, colourful, fun manner. Teach your child the basics of mathematics with this monster-game based app. From a mathematical standpoint, this app progresses children through single skills, once step at a time, building on the previous learning whilst retaining a consistent game based environment. The app covers sorting, counting, largest and smallest numbers, patterns, basic addition and subtraction, differences.

Ages 3 to 7

For iPhone and iPad

Math 8: Talk math with Leon!

Math8 is a free learning app that provides math learning by talking with a character. The app is focused on basic math skills and organized by topic: times tables, mental math, equations, and word problems. The lessons and exercises are designed by the specialists and the learning program covers one year of third grade math.

Math8 is available for free on iPhone and iPad.

Educational apps for children

awareness and is best for kids who are emergent readers with the previous reading experience.

Ages 3 to 11

For iPhone and iPad

Read with Phonics

Read with Phonics is a free app to learn Phonics (UK) that helps young people to learn synthetic phonics. This is a fantastic app that has been extremely well developed by professionals proficient in not only the topic of phonics but also with a very good understanding of the education and classroom setting. This is one of the best phonics apps, especially for UK schools. It is tied in very well to the curriculum and the processes children are used to in school and with its clean, easy to use functionality it is perfect in helping young children to read through synthetic phonics.

Ages 3 to 11

World's Worst Pet - Vocabulary

World's Worst Pet - Vocabulary is a free spelling app designed for ages 7-14. This app helps children increase their vocabulary by taking players through an adventure. We love how the narrative grabs the attention of students without sacrificing the academic component. Children are introduced to domain-specific vocabulary words in word lists that are grouped by topic. The high-quality graphics and abundance of levels make this a go-to app for vocabulary practice.

Ages 7 to 14

For iPhone and iPad

Mussila Music School

Free Music App for Kids

Mussila Music School is a free music learning app for kids. This beautifully presented app explores the adventures of the Mussila band on a musical journey. Help them find instruments, costumes and create your own music. The app is based on a music curriculum and the player progresses through skill building levels such as recognising instruments, instrumental sounds, rhythm and melodies.

Their pedagogy is based on child-centered approaches, play-based learning. Mussila Music School is the winner of the German Pedagogical Media Award.
